

SUCCESS ! AND WE NEED YOUR HELP TO CONTINUE !

Nearly five years ago, we residents decided enough was enough - the deer problem had to be addressed. Since that time, we have tried a number of methods, and this past winter witnessed a most successful solution, netting *nineteen* deer.

Though the new method utilized “volunteer” hunters under professional supervision rather than a paid contractor, in order to attract those hunters to The Point (rather than the many other available hunting areas), we had to offer incentives that were possible to “win” upon certain achieved milestones, e.g., after each doe. The idea worked - the results provide no doubt - as the hunters passed over the other areas and concentrated on The Point.

Obviously, we have decided to use the same system next winter. However, like everything else in life, success costs money, and the incentives depleted our dedicated Deer Fund. We need every Nassau Point household to again step up and contribute - any amount will be appreciated, and if you can a minimum of \$100.00, \$250.00 or any amount you are comfortable with - is

not too much to invest to limit the danger of disease and flora defoliation, loss of small animal-bird habitat, and resultant ground water and run-off waterway pollution.

The lower deer population is self-evident, but the math is staggering because of their birth rate: annually removing 43% of the population only maintains the existing numbers. So if we let up for even one season, the population will more than double in two years.

PLEASE, DON'T PUT IT OFF – WRITE YOUR CHECK NOW
to “NPPOA-Deer Fund” and send it in the enclosed envelope.

Thank you for your past support as a good neighbor, and continued interest and anticipated further support.
